

Liver Resection

Liver Resection is the surgical removal of part of the Liver. This operation is for some types of liver cancer and for certain cases of metastatic colorectal cancer. Up to half of your liver can be removed as long as the rest is healthy.

During a Liver Resection, the part of your liver that contains cancer is removed, along with some healthy liver tissue on either side. If the right side of your liver is removed, your gallbladder, which is attached to the liver, is also taken out.
